Final Expense Underwriting Guidelines

cflife.com
800-305-1335

Underwriting Requirements

This guide is intended to help you determine the right plan for your client, based on the information available to you at the time of application. Underwriters are available to assist with risk assessments Monday through Friday until 8:00pm Eastern at 800-305-1335, ext. 5904 or at Risk.Assessment@cflife.com. **Do not include any client's personal information when requesting risk assessments by email.**

For fast and easy underwriting, use eApp and Point of Sale Underwriting (POS). The eApp process provides interactive feedback and POS delivers a decision in under two minutes. POS is not available for telesales.

For All Plans

- Applicant must be within the height/weight limits for the plan (see page 4)
- The Company will conduct an MIB check and prescription drug history check*
- The Company will conduct a medical billing records database check (Dx) for telesale applications
- Applicants **age 71+** who have not seen a doctor **within the past 3 years** are ineligible for any coverage

Dignified Choice® - Classic Elite Full Benefit

- All application health questions answered “no”
- Applicants **age 60 - 70** who have not seen a doctor **within the past 5 years** are ineligible for Classic Elite
- Motor Vehicle Report for ages 18 - 35
- Tobacco premiums apply if the proposed insured has used any form of tobacco or nicotine or smoked marijuana in the past 12 months

Dignified Choice® - Classic Select Full Benefit

- Any Part 3 health question answered “yes.” All other health history questions answered “no.”
- Motor Vehicle Report for ages 18 - 35
- Tobacco premiums apply if the proposed insured has used any form of tobacco or nicotine or smoked marijuana in the past 12 months

Dignified Choice® - Classic Advantage Graded Benefit

- One Part 2 health question or two or more Part 3 questions answered “yes.” All Part 1 health history questions answered “no.”

*If the Proposed Insured is over age 70 and applying for Elite, an ExamOne report will be run if the Milliman check does not find any prescription drug history. The Proposed Insured will not be declined for the Classic Elite plan based on an absence of prescription drug history.

General Underwriting Guidelines

Use the appropriate application and any other required forms for the Proposed Insured's primary state of residence. If the application state differs from the state where the application is taken, you must be licensed in both states.

Application Health Questions

It is essential that you read each health question aloud, word for word, and be sure the Applicant understands each one. At times, an Applicant's diagnosis may fall under one of the general terms listed on the application but may be known to the Applicant by another name. Use the medical information on pages 5 through 9 as a guide and call the Underwriting Team at 800-305-1335 extension 5904 or email Risk.Assessment@cfglife.com if you have questions.

Power of Attorney

The Proposed Insured **must** sign the application. Because the Proposed Insured must personally answer the health questions, a Power of Attorney signature will not be accepted.

Underwriting Checks

Each application is run through "Irix" Underwriting Rules. If we receive information that gives us reason to believe that the Proposed Insured would not qualify for the plan applied for, an additional Personal History Interview (PHI) may be needed to obtain further information. If the Irix Rules show a definite disease or medical condition, a decision will be made based on those records.

MIB, Inc. maintains information of underwriting significance on applicants as furnished to it by member companies. Columbian uses MIB to check underwriting information, but only as a guide to identify areas about which we might need additional information before reaching a final underwriting decision. Columbian does not rely, in whole or in part, on an MIB report in making a final underwriting decision.

A Medical Billing Records Database Check (Dx) is run for telesale applications. The Dx tool helps identify medical conditions more accurately, reducing the need for a telephone interview, especially when a client is taking a medication that could be prescribed for a variety of reasons.

If the Proposed Insured has existing coverage with Columbian, the prior file will be reviewed.

Motor Vehicle Report

A Motor Vehicle Report (MVR) is run on all applicants age 18-35 who have a valid driver's license and are applying for a Classic Elite or Classic Select Full Benefit plan. An MVR may also be run if the application question regarding moving violations or driving under the influence is answered "yes" or if we receive confidential information that indicates the question should have been answered "yes."

Applicants who have been convicted of three or more moving violations or convicted of driving under the influence of alcohol or drugs within the past 36 months are ineligible for the Classic Elite and Classic Select plans.

Violations considered:

1. Speeding 15 mph or more over posted limit
2. Accident (at fault)
3. Reckless driving
4. Driving without a license, insurance, or registration

General Underwriting Guidelines

Medical Records

In instances where the regular underwriting requirements cannot provide a complete risk assessment and a review of that individual's medical records appears to be the proper source for the needed information, a letter will be sent to the applicant requesting the records be obtained by the applicant, at their expense, and forwarded to the Company. *The application will be closed but will be reopened for underwriting evaluation upon receipt of the medical records.*

Ineligible Persons

You should not take an application on anyone who:

- answers “yes” to any question in Part 1 or to two or more questions in Part 2 of the Health History.
- is institutionalized, including a penal institution or psychiatric facility.
- is mentally incompetent or lacks the legal capacity to contract.
- is not a U.S. resident. If the Applicant is a foreign national, he or she must be a legal immigrant and have a Social Security number. We accept applications up to \$15,000 on foreign nationals who have a green card or tax ID number (TIN).

This is provided as a general guide and is not intended to be a complete list.

Policy Rescissions

A policy can be rescinded when death occurs during the contestable period and we discover information that would have caused the policy to be declined or issued other than as applied for had the information been known at the time of application. If we receive information that indicates that the application may have been completed incorrectly, *including tobacco use*, we will investigate and the policy will be rescinded if necessary.

Rescissions are a serious problem in the insurance industry and are taken seriously by Columbian. We meet monthly to review all agent activity, including an evaluation of rescinded policies for each agent. **Evidence of mishandling or a pattern of rescissions is grounds for termination for any agent, regardless of production.**

While we understand that you rely on the answers provided to you by the proposed insured, there are some things you can do to help ensure the quality of the business you write:

- Use good judgment. For example, you should not take an application from someone who is terminally ill, incarcerated, or in hospice care.
- Use good observation when taking an application. For example, the presence of an oxygen machine or prescription drugs should lead you to ask further questions. *Prescriptions should be listed on the application for proposed insureds over age 70 applying for the Elite plan.*
- If you have suspicions or concerns, include a cover letter with the application. For example, if the height/weight given does not appear to be correct or you noticed a wheelchair in the home, but the applicant did not mention limited mobility, let us know. This does not mean that the policy will be declined, but does give us a chance to investigate further.

The success of our Final Expense program depends on protecting the viability and profitability of the line. Be our partner in that protection by taking extra care with the applications you write.

Height and Weight

Eligibility for plans is based in part on the Proposed Insured's height and weight.

Height	Decline	Maximum for Elite	Maximum for Select	Maximum for Advantage	Decline
4' 7"	<72	178	185	202	>202
4' 8"	<74	185	192	209	>209
4' 9"	<77	190	198	216	>216
4' 10"	<79	198	205	224	>224
4' 11"	<82	205	212	232	>232
5' 0"	<85	212	220	240	>240

6' 9"	<154	385	398	435	>435

Medical Terms

These terms are provided only as a guide and are not intended as an all-inclusive list. Please contact Underwriting with any medical questions.

Alzheimer's Disease – A progressive neurological disease of the brain that leads to dementia. May also be called *Presenile Dementia* or *Senile Dementia*.

Amputation – Generally refers to removal of part or all of a body part enclosed by skin. The application question refers only to amputation which is caused by disease.

Aneurysm – A localized widening of an artery or localized bulging of the heart.

Black Lung Disease – Lung disease resulting from coal mining. Black lung disease is also called *coal worker's pneumoconiosis* or *asbestosis*.

Cancer – Cancer is not one disease; it is a group of more than 100 different and distinctive diseases involving an abnormal growth of cells. May also be called a *malignancy*, *malignant tumor*, *carcinoma* or *malignant neoplasm*.

Chronic Obstructive Pulmonary Disease (COPD) – Characterized by significant irreversible airway obstruction. COPD includes emphysema and chronic bronchitis.

Congestive Heart Failure (CHF) – Failure of the heart to pump blood with normal efficiency. The result is congestion or the buildup of fluid in the heart or lungs. Also may be present with *cardiomyopathy*, *congestive myopathy* and *restrictive myopathy*.

Diabetes – A chronic condition caused by insulin deficiency associated with abnormally high levels of sugar (glucose) in the blood. Glycosylated Hemoglobin (HbA1c) is the gold standard in determining diabetic control and should be less than or equal to 8.0. This should be measured every six months. If HbA1c is not available, Fasting Blood Sugar (FBS) should be less than or equal to 150. Readings over these ranges indicate that the proposed insured's diabetes is not under control with current treatment.

Heart Attack – The death of heart muscle due to the loss of blood supply. Also called *myocardial infarction* or *MI*.

Kidney Failure – Loss of kidney function. Also called *renal failure*.

Liver Disease – This term includes *cirrhosis*, *hepatitis*, *cholangitis*, *liver failure*, and other diseases of the liver.

Multiple Sclerosis – A disease that attacks the central nervous system causing a loss of control over the body, with symptoms ranging from numbness to paralysis and blindness.

Parkinson's Disease – A slowly progressive neurologic disease characterized by a fixed inexpressive face, a tremor at rest, slowing of voluntary movements, a gait with short accelerating steps, peculiar posture, and muscle weakness. Also called *paralysis agitans* and *shaking palsy*.

Stroke – The sudden death of brain cells due to a disruption of blood flow to the brain. Also called *CVA (cerebrovascular accident)* or *TIA (transient ischemic attack)*.

Treatment – Administration or application of remedies for disease or injury including, but not limited to, surgery, prescription drugs, oxygen use, radiation therapy, chemotherapy, or physical therapy.

Medical Conditions

Please use the chart below to help you determine which Dignified Choice® plan best fits your client's medical history. If you need additional information regarding a particular medical history, please refer to the application or call Underwriting at 800-305-1335 extension 5904.

Condition	May qualify for	Condition	May qualify for
Acquired Immune Deficiency Syndrome (AIDS)	Not eligible	Hospitalized	Not eligible
AIDS Related Complex (ARC)	Not eligible	Human Immunodeficiency Virus (HIV)	Not eligible
Alcohol Abuse/Dependency (last 36 months)	Advantage	Huntington's Disease	Not eligible
Alzheimer's Disease	Not eligible	Immune Deficiency Disorder	Not eligible
Amputation due to disease	Not eligible	Institutionalized	Not eligible
Aneurysm (last 24 months)	Advantage	Insulin Shock (last 36 months)	Advantage
Angina/cardiac chest pain including treatment in the last 24 months	Advantage	Insulin usage prior to age 50	Advantage
Angioplasty (last 24 months)	Advantage	Kidney transplant (no dialysis in the last 12 months)	Advantage
Assisted living resident	Not eligible	Kidney Disease (last 36 months)	Advantage
Atrial Fibrillation	Select	Kidney Failure (last 36 months)	Advantage
Basal Cell Skin Cancer	Elite	Leukemia (last 24 months)	Not eligible
Bed ridden	Not eligible	Leukemia (last 25 - 60 months)	Select
Black Lung Disease	Advantage	Liver Disease (last 36 months)	Advantage
Bone marrow transplant	Not eligible	Lou Gehrig's Disease (ALS)	Not eligible
Brain tumor (last 36 months)	Advantage	Melanoma (last 24 months)	Not eligible
Bypass surgery (last 24 months)	Advantage	Melanoma (last 25 - 60 months)	Select
Cancer (last 24 months)	Not eligible	Mental disorder (hospital/institution in last 24 months)	Advantage
Cancer (last 25 - 60 months)	Select	Mental retardation	Not eligible
Cardiac defibrillator implant recipient	Not eligible	Multiple Sclerosis (last 36 months)	Advantage
Cerebral Palsy	Not eligible	Muscular Dystrophy	Not eligible
Chronic Bronchitis	Advantage	Nephropathy (kidney) (last 36 months)	Advantage
Chronic Hepatitis (last 36 months)	Advantage	Nervous disorder (hospital/institution in last 24 months)	Advantage
Chronic Lung Disease	Advantage	Neuropathy (nerve, circulatory) (last 36 months)	Advantage
Chronic Obstructive Pulmonary Disease (COPD)	Advantage	Nursing home	Not eligible
Chronic Respiratory Disorder (not asthma/sleep apnea)	Advantage	Organ transplant	Not eligible
Congestive Heart Failure (CHF)	Not eligible	Oxygen usage (excluding sleep apnea)	Advantage
Convalescent home currently	Not eligible	Pacemaker implant (last 24 months)	Advantage
Criminal conviction (last 36 months)	Advantage	Parkinson's Disease (last 36 months)	Advantage
Cystic Fibrosis	Not eligible	Peripheral Artery Disease (last 24 months)	Advantage
Dementia	Not eligible	Peripheral Vascular Disease (last 24 months)	Advantage
Diabetes Complications (last 36 months)	Advantage	Probation or parole (last 36 months)	Advantage
Diabetes not in control (last 36 months)*	Advantage	Procedure for brain circulation (last 24 months)	Advantage
Diabetic Coma (last 36 months)	Advantage	Retinopathy (eye) (last 36 months)	Advantage
Down's Syndrome	Not eligible	Sarcoidosis (last 36 months)	Advantage
Driving Violations (3 or more in last 36 months)	See MVR	Schizophrenia (last 36 months)	Advantage
Drug Abuse/Dependency (last 36 months)	Advantage	Sickle Cell Anemia	Not eligible
DUI - Alcohol or Drugs	See MVR	Spina Bifida	Not eligible
Emphysema	Advantage	Stent (last 24 months)	Advantage
Enlarged Heart (last 24 months)	Advantage	Stroke (last 24 months)	Advantage
Heart Attack (within 6 months)	Not eligible	Surgery recommended or pending	Not eligible
Heart Attack (within 7-24 months)	Advantage	Systemic Lupus (last 36 months)	Advantage
Home health care recipient	Not eligible	Terminal illness	Not eligible
Hospice care	Not eligible	Transient Ischemic Attack (TIA) (last 24 months)	Advantage
		Wheelchair confinement**	Not eligible

*Glycosylated Hemoglobin (HbA1c) is the gold standard in determining diabetic control and should be less than or equal to 8.0. This should be measured every six months. If HbA1c is not available, Fasting Blood Sugar (FBS) should be less than or equal to 150. Readings over these ranges indicate that the proposed insured's diabetes is not under control with current treatment.

**Wheelchair confinement due to illness, disease or quadriplegia.

Prescribed Medicine

Some application health questions ask if the Proposed Insured has received treatment for medical conditions. Prescription medicines are considered treatment. To speed the processing of your business, please provide the proposed insured's prescription history and the medical condition the medication(s) were prescribed for in the Special Remarks section of the application. Because many medications can be prescribed for multiple conditions, providing this information can avoid the need for a personal history interview (PHI).

The list below is not all inclusive and is subject to change. For a complete list, use the Risk Qualifier in the Final Expense Calculator. The decisions shown below and in the Risk Qualifier are based on single medications when used within the time period for the condition indicated. Some combinations of medications may affect the final underwriting decision.

MEDICATION	TIME PERIOD	IF USED FOR	DECISION
Acamprosate	36 months	Drug or alcohol abuse or dependency	Advantage
Aggrenox	24 months	Stroke or TIA	Advantage
Amantadine HCL	36 months	Parkinson's Disease	Advantage
Ambisome	Ever	HIV	Decline
Anastrozole	24 months / 5 years	Treatment (excluding maintenance) of Cancer other than basal cell skin cancer	Decline if within 24 months Select if within 5 years
Antabuse	36 months	Drug or alcohol abuse or dependency	Advantage
Aprepitant	24 months / 5 years	Treatment (excluding maintenance) of Cancer other than basal cell skin cancer	Decline if within 24 months Select if within 5 years
Aptivus	Ever	HIV	Decline
Aranesp	36 months	Kidney Failure	Advantage
Aricept	Ever	Alzheimer's / Dementia	Decline
Arimidex	24 months / 5 years	Treatment (excluding maintenance) of Cancer other than basal cell skin cancer	Decline if within 24 months Select if within 5 years
Aromasin	24 months / 5 years	Treatment (excluding maintenance) of Cancer other than basal cell skin cancer	Decline if within 24 months Select if within 5 years
Atgam	Ever	Organ / Tissue Transplant	Decline
Atripla	Ever	HIV	Decline
Avonex	36 months	Multiple Sclerosis	Advantage
Baclofen	36 months	Multiple Sclerosis	Advantage
Bafiertam	36 months	Multiple Sclerosis	Advantage
Belimumab	36 months	Systemic Lupus	Advantage
Benlysta	36 months	Systemic Lupus	Advantage
Betaseron	36 months	Multiple Sclerosis	Advantage
BiDil	Ever / 24 months	Congestive Heart Failure, chest pain / angina	Decline if ever used for CHF Advantage if used for chest pain/angina within 24 months
Calcitriol	36 months	Kidney Disease	Advantage
Calcium Acetate	36 months	Kidney Disease	Advantage
Campath	24 months / 5 years	Treatment (excluding maintenance) of Cancer other than basal cell skin cancer	Decline if within 24 months Select if within 5 years
Carbidopa	36 months	Parkinson's Disease	Advantage
Carnitor	36 months	Kidney Disease	Advantage
Carvedilol	Ever	Congestive Heart Failure	Decline
Casodex	24 months / 5 years	Treatment (excluding maintenance) of Cancer other than basal cell skin cancer	Decline if within 24 months Select if within 5 years
Chlorpromazine	36 months	Schizophrenia	Advantage
Cesamet	24 months / 5 years	Treatment (excluding maintenance) of Cancer other than basal cell skin cancer	Decline if within 24 months Select if within 5 years
Clopidogrel	24 months	Stroke or TIA	Advantage

Prescribed Medicine

MEDICATION	TIME PERIOD	IF USED FOR	DECISION
Cyclosporine	Ever	Organ Transplant	Decline
Clozapine	36 months	Schizophrenia	Advantage
Clozaril	36 months	Schizophrenia	Advantage
